Highly motivated Software Engineering Graduate with a strong foundation in programming principles seeking to leverage skills in a dynamic team environment. Proven ability to thrive in both independent and collaborative settings. Quick learner with a passion for staying current on emerging technologies.

PROJECTS

Harmony

Technologies Used: HTML, CSS, Javascript, Netlify

- A music application designed to deliver seamless and immersive musical experiences. Leveraged ReactJS to develop intuitive user interfaces and interactive features, enhancing user engagement and satisfaction.
- Implemented responsive design principles for optimal performance across various devices.
- Enhanced User Engagement: With a focus on enhancing user engagement and satisfaction, Harmony offers a range of functionalities that allow users to explore, enjoy, and interact with their music effortlessly.
- Responsive Design: Implementing responsive design principles ensures Harmony performs optimally across various devices, providing a consistent and enjoyable experience whether accessed on a smartphone, tablet, or desktop.

Zee Content Generator

Technologies Used: React JS, HTML, CSS, Javascript, MongoDB, Netlify

- A dynamic website harnessing the power of OpenAI API for generating engaging blog post content. Integrated Stripe subscription services to facilitate user access to premium content. Played a key role in developing the platform, utilizing OpenAI API to generate high-quality blog post data
- AI-Generated Blog post: Utilized OpenAI API to create high-quality, engaging blog content.
- Subscription Services: Integrated Stripe for seamless subscription management, providing users access to premium content.
- User Experience: Enhanced user experience through efficient and secure payment processing

ResumeCraft website

Technologies Used: React.JS and Redux

- Developed ResumeCraft, a web-based resume builder application utilizing React.JS to empower users to create professional resumes effortlessly. This project demonstrates my proficiency in building user-friendly interfaces and my understanding of front-end development best practices with React. JS.
- Intuitive Interface: Leveraged React.JS to create a user-friendly interface which users can easily input their information, select pre-built sections, and customize their resumes.
- Customization Options: Integrated features that allow for easy customization of resume formatting and styling.
- Diverse Industry Support : Designed the application to be adaptable for various industries by offering pre-built sections.

EDUCATION

MASTER OF COMPUTER APPLICATION

TECHNOCRATS INSTITUTE OF TECHNOLOGY
Sep 2022- May 2024

77.9%

BACHELOR OF COMPUTER APPLICATION

SAROJINI NAIDU GOVT. GIRLS P.G. COLLEGE
Sep 2019- May 2022
